

UV PROJECT CALCULATOR PRO

COMMUNITY EDITION

Release Notes

Know Your Costs. Price With Confidence. Grow Your UV Printing Business.

Built by a UV printer owner for the UV printing community.

Version 1.0 RC1 - Build 1021 - Founding Community Test Team Edition

Release Purpose

Build 1021 is the first package prepared for the Founding Community Test Team. It follows a complete internal release-candidate audit covering the Dashboard, active printer, Projects, action buttons, responsive layout, Pricing Workspace, Scenario Builder, Application Settings, and Help & Feedback.

Audited Fixes in Build 1021

QA ID	Change
QA-004	Increased customer and project-status readability in the Dashboard Current Project card.
QA-005	Added Change Printer while editing or testing a duplicated project. The selected profile loads and pricing recalculates.
QA-007	Added seven distinct status colors: Draft, Estimate, Quoted, Approved, In Production, Completed, and Cancelled.
QA-008	Guided Setup now shows Cancel on the first page and Back on later pages.
QA-009	Added an offline PDF User Guide accessible from Help & Feedback.

Major Capabilities Included

- Business Dashboard 2.0 with hero selling price, project health, current project, printer, backup, and recent-project information.

- Pricing Workspace with transparent costs, automatic quote, manual quote option, profit warnings, and saved-input recalculation.
- Unified Total Ink Used for Job workflow.
- EufyMake E1 and xTool O1 Omni family profiles.
- Scenario Builder with live comparisons and save/replace options.
- Color-coded Production and Scenario project cards.
- Application Settings, business libraries, backup and restore, reports, optional support, and Help & Feedback.

Known Release-Candidate Considerations

- This is a pre-release testing build. Keep backups of important data.
- Data is local to the browser and is not automatically synchronized to other devices.
- A configured default email application is required for mailto-based bug reports and feature requests.
- Service-worker and installable PWA behavior require HTTPS hosting and should be tested after deployment.
- Printer costs are editable defaults and should be reviewed against each user's actual supplier pricing.

Deferred Roadmap Items

- Folder, collection, or workspace organization for large project libraries.
- Dashboard Quick View popups.
- Expanded customer history and relationship management.
- Advanced analytics and enhanced reports.
- Optional cloud synchronization, automatic backup, and team collaboration.

Feedback

Use Help & Feedback in the application to report bugs, request features, or contact support. Reports are addressed to MrDon123@gmail.com and include optional diagnostic information for Build 1021.
